

Announcement 010 / 2020

Renewable Energy Policy

Home Product Center Public Company Limited and its subsidiaries operate the business with the balance between the economy, the society, and the environment according to the Sustainable Development Policy and the Energy Management Policy. The emphasis is placed upon the selection of renewable energy to support effective energy conservation. The Company announces the Renewable Energy Policy with the following details:

1. The Company declares effective renewable energy management as part of its business operation according to the Energy Management Policy and the Energy Conservation Policy in the effort to prevent possible impacts and to explore new business opportunities for the Company.
2. The Company will research and explore new technology and sources for renewable energy to achieve cost-efficiency as well as economic, societal, and environmental balance.
3. The Company will comply with the law and other regulations related to renewable energy, energy management, energy consumption control, energy consumption amount, and energy consumption effectiveness.
4. The Company will set objective, goal, and practical plan for renewable energy, which will be reviewed regularly every year or on appropriate occasion to ensure the effectiveness.
5. The Company will manage necessary resources effectively and support the design, procurement, and sourcing of machinery, tools, equipment, and other services that are crucial to the management of renewable energy to achieve the objective of the Company.

This announcement is effective from January 1st, 2020 onwards.

For mutual acknowledgement,

Announced on January 1st, 2020.
